

## Getting Help Team (0-18 years)

# Mental Health Support for Young People

This leaflet is for  
Young People (12 – 18 years)

Email: [mash@achievingforchildren.org.uk](mailto:mash@achievingforchildren.org.uk)

## Who are we?

We're a team of Child Wellbeing Practitioners based in Achieving for Children (Royal Borough of Windsor and Maidenhead) working under the CAMHS Getting Help Service.

We offer:

- Interventions for children and young people with mild to moderate mental health difficulties
- Workforce training on emotional health and wellbeing
- Consultations for professionals

The team consists of:

- Team Lead
- Children & Young People Wellbeing Practitioners
- Senior Clinical Supervisor
- Clinical Supervisor
- Administrator

## Ways in which we can support you

We help young people struggling with the following difficulties:

- Managing worry, anxiety and panic attacks
- Low mood/depression
- Coping strategies
- Sleep difficulties

After a 1 hour initial assessment, we will have a greater understanding of the challenges you are facing.

Following the assessment, we will either offer 6-8 one to one weekly sessions or point you in the right direction for alternative support.

## The interventions we deliver

Each Child Wellbeing Practitioner is trained to deliver a range of coping strategies. These interventions are informed by Cognitive Behavioural Therapy (CBT) principles and research has found them to be highly successful amongst young people. CBT can help you manage your problems by changing the way you think and behave. Your thoughts, feelings, physical sensations and actions are interconnected, and negative thoughts and feelings can trap you in a vicious cycle - CBT aims to help you deal with overwhelming problems in a more positive way by breaking them down into smaller parts. You're shown how to change these negative patterns to improve the way you feel. Unlike some other talking treatments, CBT deals with your current problems, rather than focusing on issues from your past.

Early intervention has long-term benefits such as improving self-esteem, social development and performance at school.

Worries and mood changes are normal in us all but sometimes we need some support to help us through difficulties. We are here to help you directly or put you in touch with people who can support you further.
