

Face coverings

Visitors and anyone attending an appointment or a clinic **must** be wearing a face covering.

This could be a **scarf, bandana or homemade face covering**, so long as it covers your nose and mouth while allowing you to breathe comfortably.

Please bring a face covering with you to wear when you enter the hospital. We'll provide a disposable mask if you don't have anything that you can use as a covering.

You should **wash your hands** before putting it on and taking it off, **avoid touching your face** at all times and follow other infection control safety measures, including social distancing and regular hand washing.
